

Sprint 2 Plan

Product Name: QueuedUp

Team Name: QueuedUp

Sprint Completion Date: July 13, 2020

Revision Number: 1

Revision Date: July 5, 2020

High Level Goals

- Develop a UI for users to view the discussion posts on the main Dashboard, as well as, the ability to edit and delete their own posts.
- Allow users to contribute to other posts

Task Listing, Organized by User Story

Story point system: 0, ½, 1, 2, 3, 5, 8, 13, 20, 40, 100 (max value)

User story 1 ("As a user, I want a sign up and log in form so I can start creating discussion posts"):

- Task 1: Add functionality to the "sign up" and "log in" buttons on the frontend to pop up a text form for the user to fill out
 - Story points: 20
- Task 2: Connect the user data to the backend to either create an account or log into the existing account
 - Story points: 5
- **Total for user story: 25**

User story 2 ("As a user, I want a text form to type and submit a discussion post"):

- Task 1: Create the text form in the frontend with a submit button
 - Story points: 100
- Task 2: Update the component in the frontend with the correct new content (rather than refreshing the page)
 - Story points: 20
- **Total for user story: 120**

User story 3 ("As a user, I want the ability to edit a post I created"):

- Task 1: Grab the unique ID of each post, specific to the user, and edit it in the database
 - Story points: 8

- Task 2: Update the component in the frontend with the correct new content (rather than refreshing the page)
 - Story points: 20
- **Total for user story: 28**

User story 4 ("As a user, I want the ability to delete a post I created"):

- Task 1: Grab the unique ID of each post, specific to the user, and remove it from the database
 - Story points: 8
- Task 2: Update the component in the frontend (rather than refreshing the page)
 - Story points: 20
- **Total for user story: 28**

User story 5 ("As a user, I want the ability to leave comments on discussion posts"):

- Task 1: Add a "comments" field under our "users" database
 - Story points: 5
- Task 2: Write a comment function in the backend to facilitate commenting
 - Story points: 5
- Task 3: Comment form in the frontend to add a comment, with a submit button
 - Story points: 100
- Task 4: Display the comments in the frontend
 - Story points: 100
- Task 5: Update the component in the frontend with the correct new content (rather than refreshing the page)
 - Story points: 20
- **Total for user story: 230**

User story 6 ("As a user, I want a profile photo"):

- Task 1: Install Busboy, use it to parse and handle image upload
 - Story points: 1
- Task 2: Store a default image for new users and set it to their profile on account creation
 - Story points: 13
- Task 3: Display the profile photo in the frontend, in the navigation bar and beside the user's posts
 - Story points: 100
- **Total for user story: 114**

Team Roles

- Abbas Engineer: Product Owner, developer
- Jay Ohana: developer
- James Goodman: Scrum Master, developer
- Haolin Liu: developer
- Alex Davila: Scrum Master, developer
