Sprint 3 Plan

Product Name: QueuedUp

Team Name: QueuedUp

Sprint Completion Date: July 20, 2020

Revision Number: 2

Revision Date: July 21, 2020

High Level Goals

- Users can create a profile to highlight their expertise and potentially increase their credibility behind their posts

Task Listing, Organized by User Story

Story point system: 0, ½, 1, 2, 3, 5, 8, 13, 20, 40, 100 (max value)

User story 1 ("As a user, I want a profile with my information and an 'about me' section"):

- Task 1: Add route for user profile, linked to by a username in the frontend
    - Story points: 8
- Task 2: Include user information in the profile, e.g. username, full name, profile picture, "about me"
    - Story points: 40
- Task 3: Include a button to change the profile photo
    - Story points: 40
- Task 4: Add "about me" to user profile schema in Firebase database
    - Story points: 20
- Task 5: Display "about me" to the front-end user profile
    - Story points: 40
- Task 6: Display the number of posts the user has contributed to the website
    - Story points: 8
- Task 7: Display the date the account was created
    - Story points: 5
- **Total for user story: 161**

User story 2 ("As a user, I want the ability to 'increment' discussion posts that I like"):

- Task 1: Create BE method to "increment" posts

- - Story points: 8
  - Task 2: Display an icon button so a user can "increment" a post
    - Story points: 40
  - Task 3: Display how many users have already "incremented" a post
    - Story points: 20
  - **Total for user story: 68**

User story 3 ("As a user, I want the ability to 'decrement' discussion posts that I dislike"):
- Task 1: Create BE method to "decrement" posts
  - Story points: 8
- Task 2: Display an icon button so a user can "decrement" a post
  - Story points: 40
- Task 3: Display how many users have already "decremented" a post
  - Story points: 20
- **Total for user story: 68**

User story 4 ("As a user, I want to include code snippets in my posts"):
- Task 1: When a user submits a post, parse the contents for a ``` to indicate the beginning of a code fragment
  - Story points: 2
- Task 2: Display the code in the discussion post as a code fragment
  - Story points: 40
- **Total for user story: 42**

Team Roles
- Abbas Engineer: Product Owner, developer
- Jay Ohana: developer
- James Goodman: developer
- Haolin Liu: Scrum Master, developer
- Alex Davila: developer

Task Assignment
- Abbas Engineer: user story 1: Task 3

  user story 2:
  user story 3:

       user story 4: Task 2

- Jay Ohana: user story 1: Tasks 1, 2, 3, 4

      user story 2: All tasks

      user story 3: All tasks

      user story 4: All tasks

- James Goodman: user story 1: all tasks probably

       user story 2:

       user story 3:

       user story 4: All tasks

- Haolin Liu: user story 1: Task 2

      user story 2: Task 2, 3

      user story 3: Task 2

      user story 4:

- Alex Davila: user story 1:

      user story 2:

      user story 3:

      user story 4:

Burnup Chart

Project Name: QueuedUp
